MICR Check Readers

MICR/Mag Stripe and Barcode Readers

The Scanteam 8300/8400 Series MICR Check/Barcode Reader consists of a family of check readers with various interface and decoding capabilities. All versions use a magnetic MICR read head and include a host system interface port.

Versions of this product support the direct connection to POS terminal I/O Ports, numerous keyboard wedge interfaces, hand-held scanner decoding, integrated magnetic stripe reader, and auxiliary RS-232 I/O ports. All 8300/8400 readers contain Flash memory, which allows for easy firmware upgrades in the field without the need to disassemble the printer.

Features:

- Compact size: fits into all POS installations.
- Direct Connect Interfaces: multiple interfaces included in the ST8300/84001 product
- Compatible with hundred of POS systems through keyboard wedge interface
- Mag Stripe Reader: optional integrated triple track mag stripe reader
- Flash Memory: allows for field upgrade without chip change for future enhancements
- RS-232 Ports: one standard and a second optional

MagTek's MICR check and card readers bring unprecedented ease, efficiency, and security to the retail counter. With the smallest operational footprints in the industry, these MICRs read the magnetic stripes on credit and debit cards and driver's licenses and the MICR characters on checks, moving customers more quickly through checkout lines. Our readers help reduce the risk of check acceptance at the retail counter; checks are verified instantly; mistakes caused by manual entry are eliminated. Certified by some of the largest retailers in the world, MagTek MICR check readers connect to and communicate with nearly every POS terminal and cash register on the market, transmitting data in the check processor's required format.

Check Readers

Mini MICR w/optional MSR

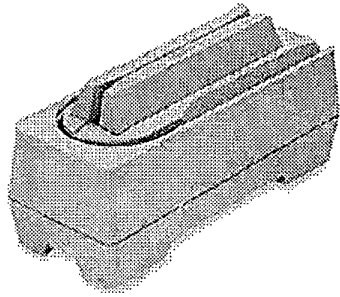

- Small footprint, low cost check reader with high accuracy and dependability
- Reads and verifies the MICR characters on checks for improved efficiency and reduced fraud
- Optional magnetic stripe reading capability reads any magnetic stripe-card or driver's license
- Choose from IBM, OCIA, Wedge or RS-232 interfaces
- Reads E13-B and CMC-7 MICR fonts

Check Readers

Maxi MICR w/optional MSR

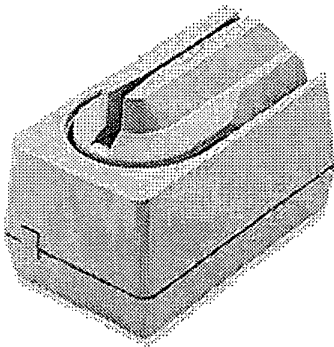

- Highly accurate and dependable check reader
- Reads MICR characters on checks for greater efficiency and reduced fraud
- ISO-standard 1- and 2-track magnetic stripe card reading capability with optional MSR
- Choose from IBM, OCIA, Wedge or RS-232 interfaces
- Reads E13-B and CMC-7 MICR fonts

Click Here for [More Information](#)

Check Readers

MICR PLUS w/optional MSR

- Highest performing small footprint check reader on the market
- Reads MICR characters on checks for greater efficiency and reduced fraud
- ISO-standard 1-, 2-, and 3-track magnetic stripe card and AAMVA driver's license reading capability with optional MSR
- Can be connected to MagTek's IntelliPIN for PIN entry
- Includes IBM, OCIA and RS-232 interfaces
- Features two RS-232 ports for connecting PINpads, barcode readers, signature capture pads
- Reads E13-B and CMC-7 MICR fonts
- Field-upgradable without chip replacement

Magnetic Ink Character Recognition (MICR) Check Readers

General Information

The combination of MICR (Magnetic Ink Character Recognition) and Magnetic Stripe Reader decodes the magnetic ink characters printed at the bottom of checks, as well as data encoded on magnetic stripe cards.

- Reads magnetic ink characters printed at the bottom of checks magnetically for secure, reliable reading
- Motorized for accuracy and ease of use
- Virtually 100% accurate
- Does not recognize altered characters
- Reduces fraud
- Significantly speeds up checkout and teller lines
- Interfaces with optional Encrypting PINpad
- Horseshoe design prevents accidental credit card erasure

Dimensions

- 9.25" long; 4.00" wide; and 4.68" High

Power

- 12 volt AC (input 120 VAC; 18 watts), 1 Amp

Interfaces

All interfaces are built into the MICR - no external interface boxes are required.

- RS-232
- PC Keyboard Wedge
- IBM - 4683, 4684, 4693, 4694
- Tranz 330/Zon Jr. XL
- PS/2 Mouse Port
- NCR OCIA
- NCR 7052 Keyboard Wedge

Custom programming devices are available on request

Standard Configurations

- MICR reader with track 1 and 2 magnetic stripe card reader (swipe)
- MICR reader only
- Interface for optional Encrypting PINpad included on all MICR units (call for details)

MICR Repository

Inspired by the late Glen Mulligan's unorthodox Xerox publication titled "MICR Cookbook"

[Home](#) [Sources](#) [Articles](#) [Resources](#) [FAQ](#)

Welcome to the MICR Repository, the first collection of information about MICR (Magnetic Ink Character Recognition) on the Internet that we are aware of.

What is MICR? MICR stands for Magnetic Ink Character Recognition, and is used to describe the special numbers and symbols you typically see at the bottom of checks, and the technology and processes to produce and analyze these characters. Click here for frequently asked questions, such as why you cannot find MICR ink for your inkjet printer.

This site is dedicated to the promotion of MICR quality. MICR printing used to be a well controlled process in the hands of a small number of commercial printers. Desktop laser printers have enabled virtually anyone to print MICR-encoded financial documents, but many users and even vendors are unaware of the related standards, and how to ensure quality MICR. The result is a steep rise in rejected checks/cheques, requiring the banks to manually correct them.

You can help make this site the most comprehensive and valuable stop for MICR information. Please let us know about any articles and resources that deal with MICR by clicking here. But keep in mind that the information must be 'vendor neutral'. While a minimal amount of vendor references will be tolerated (eg. the author, or a quote), the intent of this site is to be a reference and not a series of thinly disguised sales pitches.

Announcing The MICR E-Mail Discussion List! While this list is operated primarily for those in the industry (eg. banks, check printers, etc.), anyone with a question to ask or contribution to make regarding MICR is welcome. All you have to do is join below and send a message introducing yourself and your interest in MICR to the list members.

MICR ==>

Magnetic Ink Character Recognition

(MICR) A character recognition system using special ink and characters which can be magnetised and read automatically.

MICR is used almost exclusively in the banking industry where it is used to print details on cheques to enable automatic processing.

(1995-04-13)

About Océ | Customer Care | Newsroom | Careers

Integrated Document Solutions

A wide range of Magnetic Ink Character Recognition options

Consider a high volume MICR printer from Océ to reduce the risks associated with MICR (Magnetic Ink Character Recognition) printing. MICR can be used in printing payroll checks, insurance reimbursements, balance-transfer solicitations, and coupons or rebates to name just a few applications. More than just MICR printers, Océ Magnetic Ink Character Recognition products can help protect your organization's financial health.

Advanced Magnetic Ink Character Recognition capabilities

Magnetic Ink Character Recognition requires special precautions that are not necessary in other types of printing. The critical nature of Magnetic Ink Character Recognition applications demands integrity and accuracy in the content of these critical documents. An Océ MICR printer meets all these demands and more. For example, Océ's partnership with SDS has resulted in anti-check fraud technologies being included in Océ's MICR printer products.

Océ MICR printer solutions offer both centralized and distributed models with throughputs ranging from 700 images per minute to 500 images per minute. As volumes increase in the future, you may need to upgrade your MICR printer. With Océ's broad product range, state-of-the-art technology, quality and reliability you can.

Océ is a global leader in digital document management and delivery technology. Océ's advanced software applications deliver documents and data over internal networks and the Internet. Océ digital printers, plotters and scanners are considered the most reliable and productive in the world.

Discover Magnetic Ink Character Recognition applications.

Explore Océ MICR printer solutions.
